Antonym™ was born from designer Shannon Mikolas' desire to reinterpret jewelry design. Her vision utilizes natural gemstones and metals in vintage-inspired designs for the modern world.

The first Antonym collection was launched in the fall of 2013 when Shannon designed the Locket Keepsake. She longed for a timeless memory pendant which would allow the wearer to easily change gemstones. It remains Antonym's classic signature piece.

Today, Antonym is synonymous with sculptural design aesthetics and features three luxurious jewelry collections.

A world where the beauty of opposites comes to life.  
Where we embrace the tension between the expected and the unexpected.  
Discover beauty in the intangible.  
Romance the possibilities for reinvention.

Each piece is a harmonious balance of glamour and subtlety.  
Each piece is a vintage design for the modern world.  
Each piece is as evocative as the person who wears it.  
Handcrafted in the US and UK
